The Fellow of Interventional Pain Practice® (FIPP®) certification was introduced by the World Institute of Pain® (WIP) in 2001 to certify qualified physicians in the field of pain medicine who perform interventional techniques. The certification process employs practice-based assessment criteria to encourage and formally recognize physicians who meet the knowledge and skill requirements of the WIP Board of Examination and to serve the public by encouraging quality patient care in the practice of pain medicine. As of October 2018, WIP has certified 1125 physicians, representing 59 member countries.
